**Detailed rationale and key rating drivers**

The ratings assigned to the bank facilities and instruments of The Great Eastern Shipping Company Limited (GESCO) continue to derive strength from the long-standing presence of close to seven decades in the shipping business, demonstrated track record of operations across various business cycles, extensive experience of promoters, diversified fleet with low average age of vessels, strong market position with presence across the product, crude, liquefied petroleum gas (LPG), and bulk segment, low counterparty risk with reputed clientele, robust capital structure with low debt addition in past few years, prudent risk management policies and treasury function, and a strong liquidity position.

The ratings also factor in continued satisfactory performance reported during FY22 (refers to the period April 01 to March 31) with revenue growth of 6% in core shipping business and comfortable earnings before interest, taxes, depreciation, and amortisation (EBITDA) margin and return indicators. Significant increase in dry bulk charter rates (y-o-y growth of about 148% in FY22) compensated for the moderation in rates in the tanker segment (y-o-y decline of 53% in crude segment and 33% in the product segment), thereby enabling the revenue growth. The industry outlook for the medium term is also expected to remain favourable with rise in the charter rates for the product/crude segment as well as stronger charter rates for bulk segment, although the same has declined from the peak levels witnessed in FY22.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications  
CARE Ratings Limited

The rating strengths are tempered by the risk associated with volatility in charter rates considering nearly 80% of its fleet is deployed on spot basis and inherent cyclical nature and regulatory risk related to the shipping industry.

### Rating sensitivities

#### Positive factors – Factors that could lead to positive rating action/upgrade:

- Debt-free position of the company on a sustained manner.

#### Negative factors – Factors that could lead to negative rating action/downgrade:

- Any large debt-funded capex/acquisition impacting financial risk profile with overall gearing beyond 0.75 times.
- Any additional extension of financial support to group companies.
- Moderation in the liquidity position of the company on a sustained manner.

### Detailed description of the key rating drivers

#### Key rating strengths

**Strong market position and established track record:** GESCO is the largest private shipping company in India and is promoted by the Sheth brothers and Bhiwandiwallas. Over its presence of seven decades, the company has a demonstrated track record of operating across business cycles. It has developed a strong clientele with major counterparties being the reputed charterers in oil and gas industry as well as major commodity traders. GESCO derives approximately 60% of the revenue from foreign/overseas entities and the rest from Indian companies.

The company is managed by well-qualified professionals with K.M. Sheth (Chairman), the second generation of Sheth family, representing the Board of Directors. The board comprises adequate mix of executive and non-executive/independent directors ((8 out of 15 directors are Non-Executive - Independent Director), thereby reflecting prudent corporate governance practice.

**Diversified fleet with low average age of vessels:** GESCO has a strong market presence with well-diversified and large fleet of vessels comprising tankers, product/ gas carriers and dry bulk carriers. As on March 31, 2022, the company owns and operates 45 vessels with deadweight tonnage (DWT) of 3.57 million and average age of fleets as 12.65 years. The company historically has been operating a fleet of young ships which gives it the competitive advantage and reduces associated costs. The fleet holding since last few years is as follows-

	FY17	FY18	FY19	FY20	FY21	FY22
Fleet Nos.	42	49	47	46	46	45
DWT (million)	3.38	3.97	3.84	3.69	3.66	3.57
Average age	9.68	11.33	11.44	12.20	12.02	12.65

About 60% of the fleet capacity (in terms of DWT) operates in petrol/crude tanker segment, 6% in gas tanker segment and the rest 34% in dry bulk segment. The company also operates offshore business through its wholly-owned subsidiary, Greatship India Limited (GIL). GIL has four jack-up rigs and 19 offshore-support vessels.

**Satisfactory financial performance during FY22:** The overall financial performance continued to remain satisfactory in FY22. The income from shipping business has grown by about 6% in FY22 over FY21, led by increase in the earnings from dry bulk segment. The dry bulk rates started rising from Q4FY21 and rallied during FY22 with increase in the rates by about 148% in FY22 (from 10,907 USD/day in FY21 to 26,995 in FY22). On the other hand, the average prices in the crude, product carrier and LPG segments declined by 53%, 33% and 2%, respectively. The lower charter prices in tanker segment were compensated by increased in the charter rates in the dry bulk segment resulting in stable EBITDA of 45.37% in FY22 as against 45.31% in FY20. The return on capital employed (ROCE) stood moderate at 11.63% in FY22.

**Robust financial position and prudent risk management policies:** The company has a favourable capital structure with low debt addition over the past few years. The leverage position has been comfortable with overall gearing at 0.61x (0.07x on net debt basis) as on March 31, 2022. Over the past few years, there has been relatively lower fleet addition, and the company

*PJ*

envisages to continue with its conservative leverage policy with no major debt-funded asset addition planned in the near term. With strong accruals reported, the debt coverage metrics have been comfortable. GESCO has provided Letter of comfort for bullet debt obligation of subsidiary company; GIL, in FY25 amounting to ~\$97 million. CARE factors in strong cash position of the company and expected sustainability for maintaining the same in assessment of overall financial risk profile. Hence, no support is expected from GESCO to subsidiary GIL.

The company has prudent risk management policies covering forex, treasury and liquidity management, given its presence in highly cyclical industry. While the earnings and expenses are both in foreign currency, thereby providing natural hedge, a large part of liability (69% of borrowings as on March 31, 2022) is in the domestic currency (INR). To mitigate the forex risk, the company through interest rate swaps and forward contracts has formed synthetic fixed rate USD loans. By entering currency swap, the company reports Mark to Market (MTM) changes which are routed through profit and loss account (actual settlements and cash outflows incur at time of maturity) and during FY22, GESCO has reported a MTM gain of ₹90 crore.

Furthermore, GESCO has also provided Letter of comfort for bullet debt obligation of subsidiary company. Greatship India Limited (GIL), in FY25 amounting to around US \$97 million. CARE Ratings factors in strong cash position of the company and expected sustainability for maintaining the same in assessment of overall financial risk profile. Hence, no support is expected from GESCO to subsidiary GIL.

**Liquidity:** Strong

The cash accrual generation comfortably covers the debt servicing obligation of the company, It is expected to generate gross cash accruals (GCA) of around ₹1,000 crore against debt servicing obligation of ₹459 crore over the next one year. GESCO has a well-defined liquidity policy whereby it maintains cash and cash equivalent to meet next three years' debt servicing, capital commitment and dividend payments plus US\$100 million cash. A stress test is conducted on a quarterly basis to ensure adherence to the policy framework.

As on Mar.31, 2022, the liquid funds stood over ~Rs.3,000 crore (as against Rs.3,090 crore as on Mar.31, 2021). GESCO maintains liquidity in the form of dollar denominated FDs, bank deposits or liquid funds. The working capital cycle is also lean with recovery of bills within 25 days.

**Key rating weaknesses**

**Profitability susceptible to fluctuation in charter prices:** GESCO has, over the past few years, moved from time charter (assured long term agreements) to spot market operation resulting in deployment of almost 80% vessels on spot rate and balance 20% on time charter basis (mostly LPG carriers). The strategy of the company regarding the fleet mix is to keep majority of its capacity open to take advantage of strong markets. While it has gained in the past few years on account of this high operating leverage and low financial leverage, the risk associated with adverse movement in charter rates is on the higher side as seen during FY19-Q1FY20, resulting in loss for the company. In FY22 also, while the product/crude carrier rates crashed by almost 30%-50%, the same was compensated by the rise in bulk rates thereby supporting revenue/profit for the year.

**Cyclical and regulated nature of shipping industry:** The performance of shipping industry is directly linked to global trade flows. During the times of macroeconomic growth, the demand for vessels increased leading to higher charter rates translating into higher profits for ship operators. On the contrary, in economic downturn, the demand for vessels dip causing lower charter rates. The company is exposed to the regulations from both domestic and international agencies and has to undergo regular capex to comply with the regulations.

During FY22, the freight rates in dry bulk segment reached multiple highs due to the pent-up demand and supply chain congestions at ports caused by COVID-19 pandemic. Though the prices have come down during FY23, it is expected to remain above pre-COVID levels in the medium term due to continued port congestion.

The freight rates for crude and product tankers remained low in FY22 (after surging in April 2020 due to strong demand for crude storage) with crude and petrol trade remaining below pre-COVID levels. Russia/Ukraine war has caused a great deal of fleet dislocation which has led to spike in the tanker earnings since February 2022, the rates have doubled over FY22 level. With demand for tankers recovering to pre-pandemic levels and growing at a decent pace, tanker rates are expected to see recovery in FY23. Nevertheless, any negative impact on the demand due to higher inflation would lead to demand destruction and fall in charter rates.

#### **Analytical approach:**

Standalone. Additionally, CARE Ratings has factored in Letter of Comfort provided by the company to its subsidiary, ie, Greatship India Limited (GIL) towards bullet repayment of term obligation payable in FY25. Furthermore, CARE Ratings understands that the subsidiary in offshore business segment (GIL) would not seek financial support for debt repayment from the parent company (i.e., GESCO).

**About us:**

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

**Disclaimer:**

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
